

Farm # 14720

Disclaimer: These coordinates are for your benefit in locating critical points on HSP leased properties. The coordinates that we provide have been determined by using GPS information provided to the public. The accuracy varies with each GPS unit, each day. Since the range of accuracy can sometimes cover a large area you should not presume that because you have a reading that matches the coordinates we have provided that you are on the correct property. These coordinates will allow you to get in the general area of our boundaries, but you must use the aerial photos, maps, common sense and GPS all in conjunction to determine where the boundaries of our farms are. The coordinates that we have selected are located on the properties boundaries which means that once the coordinate is reached, you are inherently on the boundary line of a farm, and could possibly be just over the line. Just because your GPS unit matches the coordinates that we have provided does not indicate that you are on the correct property, and it is not an acceptable excuse for being on a non-HSP leased property. If you are on a property and find that the coordinates that we have provided and the coordinates that your GPS is giving do not match up you must notify us so that we may attempt to rectify the
